### ABSTRACT

In this article, scientific information is given in order to analyze the interdependence of the work carried out in the social sphere and the creation of a stable society as a result of the reforms implemented in Uzbekistan and their socio-historical aspects.

### KEYWORDS

State, Higher education, Youth, School, Sports, People, Neighborhood, Prosperous village, Patriotism, Financial independence, Modernization.

### INTRODUCTION

Today, the fundamental changes in the implementation of renewal and reforms in our country indicate that solid foundations are being created in connection with social policy and economic development. In particular, the strategic tasks assigned to the Ministry of Economy of the Republic of Uzbekistan by Resolution No. RQ-2934 of April 28, 2017 are extremely important for the development of the economy of our country and the further acceleration

of social processes. Among them, there is a special place in the country's short-, medium- and long-term sustainable and balanced socio-economic development, the development of concerted, complex, targeted, network and regional programs aimed at improving the well-being of the population and solving its most important problems. Based on the strategic principles reflected in this decision, taking into account the situation in the world

markets and the long-term prospects of the development of the global economy, deep structural changes are being made in the economy of our country, to ensure the competitiveness of the products produced in our country in the domestic and foreign markets, to localize production. On the basis of deepening, specific measures are being taken to increase the export potential of our country and reduce the economy's dependence on exports. At the same time, one of the most important changes implemented in Uzbekistan is the transparency of economic and social reforms, as well as the direct involvement of the public in all areas of our society. In this regard, large-scale reforms aimed at further liberalization of Uzbekistan's economy, improvement of its legal framework, diversification and modernization of production, as well as free currency conversion are extremely important in today's period of renewal in the country. In turn, this means continuous improvement of the methods and forms of the work of all state authorities and organizations in this direction, their structural units, on a systematic basis, avoiding bureaucratism and censorship in practical activities, responding to citizens' appeals in a timely manner. , is the basis for further increasing their responsibility for the realization of their rights and interests. Based on the strategic priorities of the promising socio-economic development of our country, all this creates more opportunities for deepening the reform and liberalization of the

economy, ensuring the priority of private property, and strengthening the protection of the rights and interests of entrepreneurs. At the same time, it is the development and implementation of programs for the socio-economic development of the republic's territories, the intensive and comprehensive development of the territories that ensure the elimination of disparities in the economy and the living standards of the population, and the optimal deployment of production forces, and on this basis, the incomes of the population of our country and ensures the efficient operation of the mechanism of consistent growth of employment. Wide sections of the population participate in the socio-cultural life and give the activities of the local authorities in this direction, the decisions they make, their practical life rich meaning, a specific goal, orientation to satisfy the various cultural needs of the citizens. In this way, they perform the function of increasing the level and quality of social and cultural services. From this point of view, based on the growing role of neighborhoods in the socio-political and spiritual-cultural life of our country, self-sufficient cultural and educational service institutions, sports grounds, it is important to participate in the work of domestic service houses, teahouses, local enterprises, institutions. At the same time, relevant ministries and agencies are assigned the task of providing farm and household equipment for neighborhood residents and teahouses at preferential prices, and providing small enterprises under the

management of the fund with the necessary machine tools, spare parts, raw material products and semi-finished products. also ensures the effectiveness of reforms in this regard. The most important thing is that the social and cultural service sector for the population of the neighborhood is being brought closer to the residences, the service is diversified, and the cultural needs and demands of the citizens are being organized. He closely supports local authorities in holding cultural events, providing household services, beautifying residences, improving communal services, providing residents with water and gas. In the following years, bakeries, kitchens, chemical cleaning, carpet repair, and trade outlets were created in the neighborhoods, and these measures are aimed at improving the socio-cultural life of the population and raising the standard of living. At the same time, the neighborhood is not only a place for our people to live as a community, but also a place for active participation in social life as a civic institution. In this direction, let's take the practice of strategic principles in the field of creating conditions for employment of people living in our country and further increase of their income. In this regard, the President of the Republic of Uzbekistan dated May 6, 2017 "On measures to increase the personal responsibility of the heads of local executive authorities and regional bodies of the economic complex in increasing the effectiveness and efficiency of the work carried out to ensure the employment of the population". "On measures to further develop the

activities of culture and art organizations, creative associations and mass media, and to create additional conditions for stimulating the work of industry employees" (14.08), "2018 - 2019 , on the primary measures for the development of the tourism sector" (16.08) and other Decisions occupy an important place.

In this regard, systematic work on improving the living and working conditions of the population, updating the appearance of cities and villages, and raising them to the level of modern requirements also affects the effectiveness of the results. In particular, in this direction, the Decree of the Resident of the Republic of Uzbekistan dated March 29, 2018 on the "Prosperous Village" program and additional measures for the implementation of the "Prosperous Village" program in 2018 "On" and the works being carried out on them are a clear proof of this. According to this document, it is related to "fundamental renewal of the architectural image of the rural population groups, development of regional complex, construction of road-transport infrastructure, engineering-communication networks and social sphere objects, and on this basis, improvement of the living culture of the population." The main attention is focused on the performance of urgent tasks. Adoption of the "Prosperous Village" program by the President of the Republic of Uzbekistan and its consistent implementation in life will serve to encourage all citizens, especially young people, to do good deeds, to implement work on the

improvement of rural areas and neighborhoods, and to further expand the noble traditions of our people in this regard.

Also, in order to ensure the effectiveness of reforms in the social sphere, the President of the Republic of Uzbekistan "On encouraging participants of the Second World War" (04.04), "Further development of oncology services in the Republic of Uzbekistan in 2017 - 2021 and the population On measures to improve the provision of oncological care" (04.04), "On measures to further develop the private sector in the health sector" (01.04), "Drinking water supply in 2017-2021 "On the program for the complex development and modernization of water supply and sewage systems" (20.04), "On the program for the development of the heat supply system in 2018 - 2022" (20.04), "In 2017 - 2021 "On measures to further improve the system of preservation and use of housing stock with houses" (24.04), "Measures to regulate the rational use of underground water reserves in 2017 - 2021" "about" (04.05), "On measures to further develop the provision of specialized medical care to the population of the Republic of Uzbekistan in 2017-2021" (20.06) and "Further improvement of the state support system for the disabled "On measures" (01.08) of historical significance also serves to effectively implement the strategy "We will create NEW Uzbekistan together" in this area. All this indicates that the experience of effective operation in this direction has been formed in

our country since the first years of independence, and the work is being carried out based on this experience even today. Today, our country has entered an important stage of its development. In terms of social policy, new steps are being taken, based on the great experiences of the years of independence, while consistently continuing the existing traditions. If we look at the past period after 2016, we will witness how many great things have been implemented in our country in this short period of time. For this, it may be enough to take a look at the work done in connection with the implementation of the task of developing the social sector to imagine how the strategy of "We will create NEW Uzbekistan together" works in this area. Also, systematic work was carried out to ensure human rights, strengthen accountability and openness of state bodies, and increase the role of civil society institutions, mass media, and political activity of citizens and public associations. Effective measures to reform the national economy, liberalize foreign trade, tax and financial policy, support entrepreneurship and guarantee the inviolability of private property, organize deep processing of agricultural products, and ensure rapid development of regions. was seen. Strengthening the social protection of citizens and reducing poverty is defined as the priority direction of the state policy, providing the population with new jobs and a guaranteed source of income, qualified medical and educational services, and decent living

conditions has reached a new level in terms of quality.  
was raised.
