### KEYWORDS

Mobile app, self-study, Ibrat academy, interactive ways of learning.

### INTRODUCTION

Learning foreign languages is important in today’s world as it helps to broaden outlook of people as well as open wide range of work and study opportunities for youths. With the help of developing internet and modern technologies, there are plenty of opportunities, free language learning process is available. There are various ways and methods of learning a foreign language but the way of learning through mobile applications can be the fastest way and

develop the process of learning English. It is possible to improve grammatical knowledge and communication skills through mobile language learning apps (T. Koyshkenova & J. Sultangalieva 2024). Mobile learning is considered as the important element of lifelong learning. Mobile learning gives an opportunity to learn continuously and independently outside the classroom (Sharples, Arnedillo – Sanchez, Milrad, & Vavoula, 2009).

All students own smartphones, by downloading language learning apps, students can learn foreign languages independently in their free time, in their comfortable place. There are various types of mobile language learning apps, but it is vital to choose the convenient and effective one. “Ibrat academy” mobile language learning app is useful to learn foreign languages from the lowest level to the highest one.

Ibrat academy contains effective video lessons, interesting interactive tasks and tests to check. The main objective of this platform is to help youths and adults to learn foreign language in effective way. Furthermore, motivate students to learn and improve language levels independently via mobile app. This app lets learners to learn a language in any place and in any time. Moreover, this app contains game based elements, which does not let users to bore with the way of learning foreign languages.

The stage of video lessons, help learners to understand the topic accurately. Not all language learning apps or platforms contain video lessons as it can be a bit difficult for learners to understand the content clearly, rather in Ibrat academy with the help of video lessons, all topics are explained in detail with examples. It helps learners not to lose their motivation to language learning independently.

The stage of interactive tasks, motivate learners to consolidate their learned materials. Moreover, it

improves learners’ language levels permanently. By these regular exercises, students’ level can improve rapidly.

Organizing language learning time, it is vital to do exercises and to use the platform regularly in order to reach certain level. So that, users have to do particular amount of time exercising and completing tasks every day. For instance, to do regular preparation about 20 or 30 minutes daily can be enough to improve language level in regular rate.

It can be also useful to learn languages via Ibrat academy together with friends or group-mates. This can help to make the process more interesting. Another motivational side of this platform, it gives level certificates when learners complete amount of tasks on certain level, and receive A1 to C1 level certificates which motivate learners to work more on themselves.

The platform of “Ibrat academy” let learners to learn foreign languages for free. This gives a chance of learning foreign languages without hesitation and do not waste free time of students. The founder of the Ibrat academy is Rustam Qoriev who wants to help youths to learn foreign languages in innovative way and independently. This platform contains video lessons for teaching nearly thirteen foreign languages. The use of Ibrat academy started in 2022, in this time the users of this mobile platform is more than one

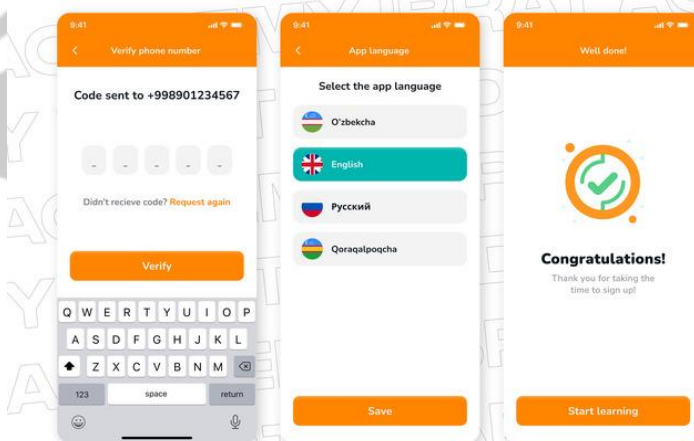

million and four hundred people. More than five thousand and nine hundred people are followers of YouTube platform of Ibrat academy. These numbers show the intention of learning foreign languages through the digital platforms in distance.

The process of starting learning foreign languages independently through Ibrat academy is easy. First of all, the app that called Ibrat academy should be downloaded. Then participants fill the forms about themselves. After this process, students choose one foreign language and may take placement test and

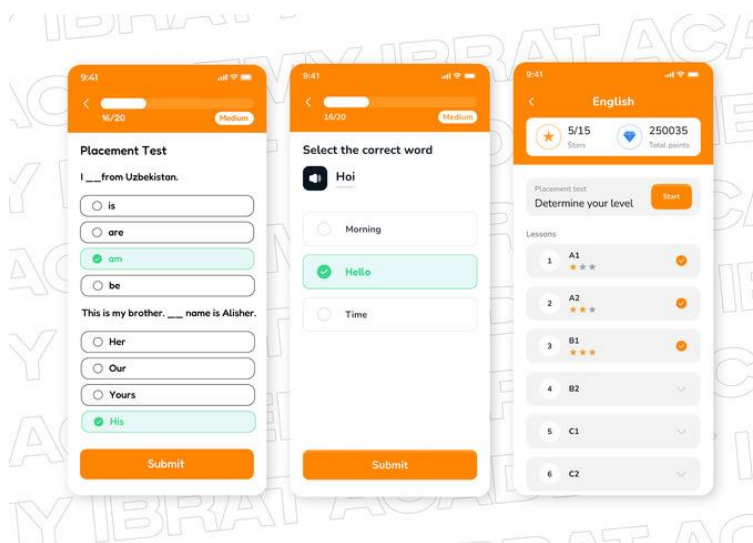

know their level of foreign language, then the platform offers lessons related to language level. It is easy to learn new lessons, the platform works in online and offline format. Users can download lessons and work on at any time which is convenient to them. This is an opportunity for people who have some problems with internet connection.

In the following pictures, it is shown the process of downloading and registering to language courses, types of tasks in Ibrat academy mobile language learning app.

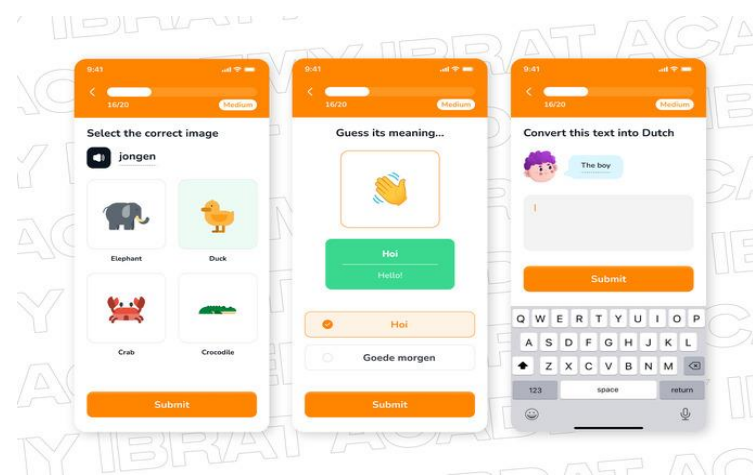

**Picture 1, in this picture, it is shown that the ways of registration and the process of choosing intended foreign language to learn.**

Picture 2, the next process is taking placement test and offer of lessons and tasks related to the level of participants.

Picture 3, this mobile platform contains eight ways of language learning activities to improve vocabulary level of students and other skills too.

In the future this app may contain artificial intelligence related functions. Of course, nowadays the AI is really developed all over the world and it also can help to improve the process of language learning. It could be double plus for learners to improve their language levels with the help of artificial intelligence, take

advices and instructions to improve the way of learning foreign languages.

There are plenty of mobile apps that help to learn foreign languages in distance, as self-study learning

process. It is important to choose effective one and practice regularly.
