### **ABSTRACT**

In this article discussed about professional training as a factor of professional skills improvement of future teachers

### **KEYWORDS**

Professional training, spiritual and potential, educational institution.

### **INTRODUCTION**

Professional training of future educators is the most complex process of modeling the intellectual, spiritual and scientific potential of children, so that they become subjects of self-development.

The success of the reforms will be reflected in how the educational institution, which is the main link of the system, will change in the near future and what will be determined in the future plans. The development of the educational system, the proper education of a

mature person is in the hands of enthusiastic educators. Therefore, the issue of their professional training and proper organization of their tasks is important.

### **DISCUSSION**

Today, great importance is attached to professional training of pedagogues, further development of their skills, and creation of conditions. This places great

responsibility on educators. It is necessary to achieve the quality and efficiency of activities for future educators. Their tasks in the educational process are directly related to their professional training. In this regard, it is necessary to pay attention to the following in order to control the professional training of future educators and improve the quality of work:

- to correctly understand the essence of the changes and reforms taking place in the society;
- to study in depth the decrees and decisions in the field of education and increase the range of socio-political outlook;
- organization of modern classes based on new pedagogical technologies;
- creation of visual aids in accordance with world requirements;
- to teach pupils national and universal qualities and traditions;
- based on the latest achievements and best practices of specialized disciplines
- write scientific articles;
- monitoring the educational level of students during practice;
- acquisition of personal and professional qualities, standards of etiquette;

If the above-mentioned tasks are carried out correctly, the professional skills of future teachers will be further increased. Educators who want to have full professional training should, first of all, have a deep knowledge of the State Education Standard (DTS), only then will the efficiency of their professional activity increase.

The profession that plays an important role in the formation of a person's life and personality is the profession of education. A single mistake of a doctor can affect the life of a person, but a single mistake of a teacher can have a negative impact on the lives of

many children. Because the child fulfills the responsible task of forming the qualities unique to his personality, instilling hope and trust in them, and organizing his future.

Educator - Educator instills in preschool children basic knowledge about nature, social phenomena, the work of adults, cultural ethics, the habits of being in a civilized relationship with their peers and adults, kindness, truthfulness, justice, courage, modesty, respect for adults, interest in nature, provides observation, knowledge and education about plants.

An educator is distinguished by his responsibility for the fate and future of each, young generation, society. The future is determined by the result of the educator's work. Pedagogical skill is a system of professional qualities that determine the success of pedagogical activity.

When a person recognizes himself, there is a teacher with him. The fate of every person is related to him, passed through his hands. In ancient times, this profession was considered divine. It is now a popular profession. Society will be like the future teacher.

The main tasks of a teacher of a preschool educational organization:

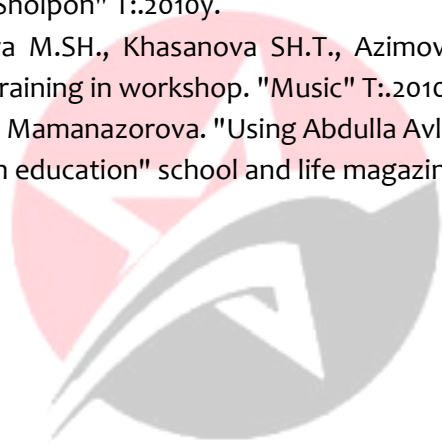

- Learning and mastering pedagogical situations.
- Determination of pedagogical goals and objectives.
- Work on the content of the educational material.
- Pedagogical analysis of information.
- Formation of children's self-service and social skills.
- Considering children's mental and physical development and condition.

## **CONCLUSION**

Therefore, the educator's responsibility towards the upbringing of the child and the society is very high, so only capable and talented people should be engaged in pedagogical activity. Important professional qualities - diligence, ability to work, orderliness, responsibility, accountability, determination, striving to constantly improve the quality of one's work should be an indelible beacon of the future teacher.
